Represent the data, which includes the total count of account numbers against the country, in a tabular format.

- **United States Dominance:** The United States has the highest number of accounts, significantly surpassing other countries.
- **Canada and Denmark Tie:** Both Canada and Denmark have the same number of accounts (14).
- **Mid-Tier Group:** Brazil, China, Greece, India, and Japan have a similar number of accounts (9-10).
- **Small European Presence:** Germany, Ghana, Spain, and France have relatively lower account counts compared to the top countries.

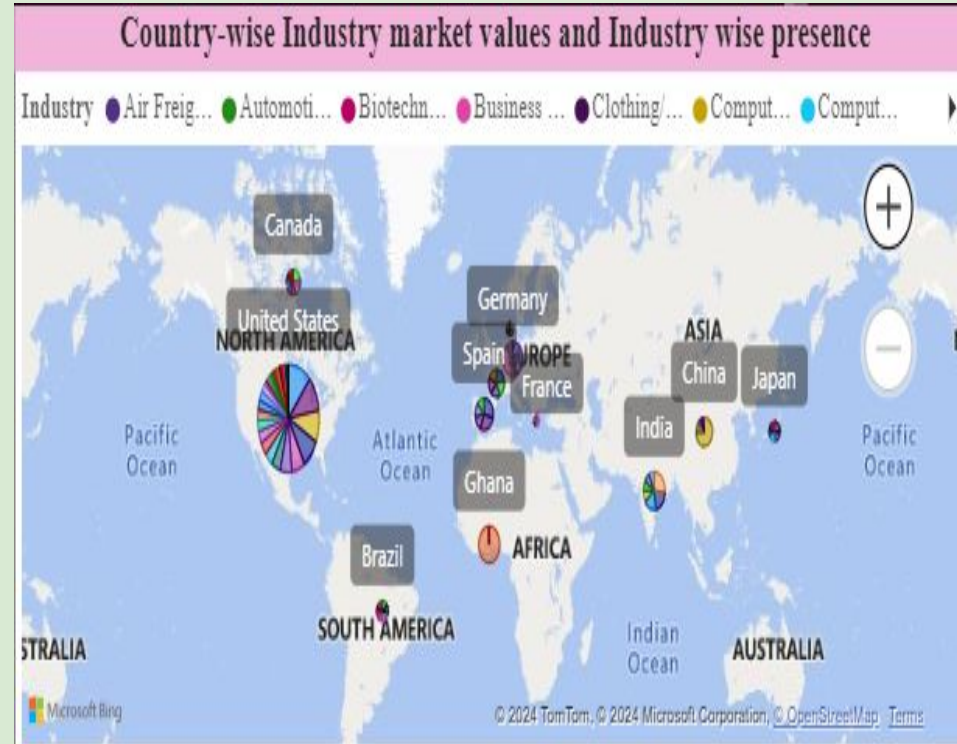

Overall, the data suggests a concentrated presence in the United States with a more distributed presence across other countries.

Country-wise Industry Market Values and Industry-wise Presence

- **Regional Dominance:** North America, particularly the United States, appears to have a strong presence across various industries.
- **Emerging Markets:** Asia, specifically China and India, are emerging as significant markets for multiple industries.
- **Profitability:** in USA, life insurance has the highest and biotechnology has the lowest profitability.

Overall, the data suggests a concentrated presence of various industries in United States with a more distributed presence across other countries.

Industry-wise profitability trends

- **Top Performers:** Life Insurance and Computer Software: Programming are the most profitable industries by a substantial margin.
- **Mid-Tier:** Real Estate, Business Services, Investment Trusts, and Major Pharmaceuticals form a mid-tier group with moderate profitability.
- **Lower Tier:** The majority of industries fall into this category, with profitability levels significantly lower than the top performers.

Overall, there is significant disparity in profitability across industries.

Industry-wise profitability percentage

- **Top Performers:** Life Insurance and Computer Software: Programming stand out as the most profitable sectors with substantial pie segments.
- **Mid-Tier:** Industries like Real Estate Investment Trusts, Business Services, and Major Pharmaceuticals occupy a middle ground in terms of profitability.
- **Lower Tier:** The majority of industries fall into this category, characterized by smaller pie segments and lower profitability percentages. Diversified commercial services have the lowest share of profitability.

The data reveals a significant disparity in profitability percentages across various industries.
